

ca
E
member and an inner tubular liner in coaxial relationship with the knit tubular member, wherein
the knit tubular member is generally not radially expandable.

E2
10. (Once Amended) The catheter section of claim 1 wherein the knit tubular
member comprises a multifilament wire.

E3
31. (Five Times Amended) A catheter comprising an elongate tubular member
having a proximal end, a distal end, and a passageway defining a lumen extending between those
ends, said elongate tubular member comprising:

a relatively stiff proximal segment; and
a relatively flexible distal segment comprising a knit tubular member and an inner tubular
liner in coaxial relationship with the knit tubular member, wherein the knit tubular member is
generally not radially expandable.
